DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Mazzoni USPN 5,233,343.

(Re claim 1) “determining whether a predefinable number of changes have been made to the data stored in a server and ... transmitting control commands to a parcel compartment system via an interface when a predefinable number of changes have been made to the data”. The server being the device (16 figure 1) and it being capable of storing information regarding the control of system, and the determining step being done by the device prior to transmission of the data from the device with its IR interface.

(Re claim 2) “control commands change operating parameters of the electronic parcel compartment system” (lines 35-42, col 2).

(Re claim 3) “control commands act upon an electronic control unit located in the electronic parcel compartment system to change available operating functions” (7 figure 4)

(Re claim 4) “operating functions comprise a possibility to open parcel compartments” (line 57 col 1)

(Re claim 11) "transmitting data to the server via the parcel compartment systems" (lines 37-39 col 2)

Allowable Subject Matter

Claims 5-10 and 12 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. USPNs 4,894,717 and 5,231,272.
